Available devices:

HKM 40-02H $4 \times HDMI \mid 2 \times DVB$ -C/T or in IPTV

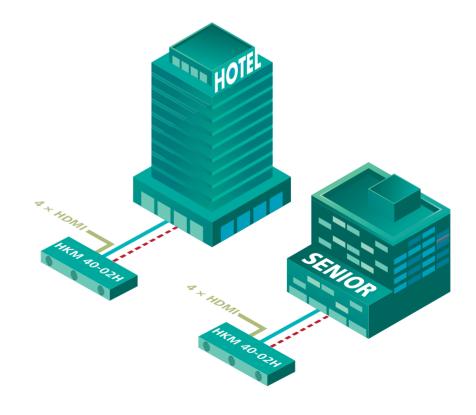

Software extension: HKS 1-00H IPTV output

Accessories:

HKZ 1-00 Front panel for 19" usage

Hybrid technology

The new modulator initially offers DVB-C or DVB-T signals at the output as usual. However, due to the hybrid technology, these can be extended to include IPTV with the software extension HKS 1-00H. This gives you planning security for the future. Should you upgrade your building to IPTV in the future, you can use the HKM 40-02H to stream hotel videos or info channels in parallel in IPTV. This allows, for example, a smooth transition floor by floor.
